

# TECHPROCOIN

WHITEPAPER

# ABSTRACT

Blockchain technology is poised to disrupt more than 19 different industries by 2015. Large corporations are already positioning themselves to transition to blockchain-based systems. SMEs also need to adopt blockchain technology to enjoy the benefits of security, confidentiality, and transparency. However, it is difficult for most SMEs to do this without help from experts in the field.

TechProCoin Group is a company made up of experts in different fields. We have MLM software experts, cryptocurrency traders, crypto mining experts, smart contract developers, ERC-20 experts, web design gurus and ERC-721 DAPP experts. We can create tailor-made technology solutions to help your business adopt cutting-edge technology.

We are currently creating a blockchain that will provide clients with all these services. We will help SMEs implement these technologies while offering investors an opportunity to earn from our mining farm, online betting platform, and cryptocurrency trading pool. We will achieve this by offering potential investors an opportunity to support our Group to create a blockchain-based platform by taking part in our ICO.

This is different from other ICOs because we will be offering instant utility once the platform is launched. All the services highlighted before will only be achieved using our TechProCoin token. This creates a market for investors holding the coins. Additionally, will share our proceeds from the cryptocurrency trading pool and the mining farm with TechProCoin token holders through occasional airdrops. Clearly, this will be different from other ICO. Join us and earn money as you help us bring blockchain solutions closer to SMEs.

# INTRODUCTION

Technological innovation is the backbone of most of the modern developments around the world. The proper adoption of technology can be the make or break point for most businesses. Firms like Dell and Amazon rose to the top by leveraging the internet as the emergent technology at the time. Right now, the emerging technology is blockchain technology. Many people understand blockchain technology from the perspective of cryptocurrencies. However, blockchain has far-reaching effects on the business world. Experts believe that by 2025, over 19 industries will be fully disrupted by blockchain technology. Additionally, blockchain technology offers businesses an alternative investment vehicle. The high spread in the industry can be used to improve the liquidity of a business.

However, cryptocurrencies and blockchain technologies are highly technical sectors and most businesses are unaware of how they can best leverage the technology to their benefits. They are unaware of the best investment strategies or the best ways they can integrate blockchain technology to their existing business model.

# THE TECHPROCOIN SOLUTION

## WHAT IS TECHPROCOIN?

TechProCoin is a software development and technological innovation company that aims at supporting businesses leverage current or future technology to actualize their real potential. We have the vision of becoming one of the leading software technology firms around the globe. We have already helped many firms find the right way of implementing technology in a way that does not disrupt their business model. Instead, technology helps them achieve their objectives more easily and more efficiently. We are also experts in helping firms adopt the right cryptocurrency trading and mining strategies to ensure that they get handsome returns in the highly volatile cryptocurrency market.

Additionally, we are experts at blockchain technology and help firms adopt blockchain solutions to help them ease their workload. We have helped numerous firms develop smart contracts that are tailor-made for their specific businesses. Our approach involves cooperating with clients to ensure that they can get the best blockchain solutions even for the most complex business processes.

## WHAT ARE OUR COMPETENCIES?

Our team comprises of experts who are competent in coding, blockchain development, web development, software development and technology adoption in business. Coupled with our professionalism and experience, we can provide numerous tailor-made services to clients. They include:

i. Bitcoin and altcoin investment. Our analytics department is skilled in reading the micro-trends in the cryptocurrency industry. As a result, we can offer clients the best signals to ensure that they grow their bitcoin and altcoin investments. We can also help them identify the best ICOs to invest, ensuring that they get handsome returns on their investments.

ii. Cryptocurrency trading. Our trading department is full of expert traders who make insightful trades. They are good at reading the technical and economic signals to make high-leverage trades in the industry. Additionally, we able to make micro-trades when the market is bearish. The pooling of capital from our clients allows us to use different strategies to ensure that they make good daily returns.

iii. Bitcoin and altcoin mining. Mining is minimal risk approach to making good returns in the industry. We are planning on expanding our existing mining farm and opening more with the capital raise to make it more profitable. Once the computing power is high enough, people will be able to make some handsome profits mining Bitcoin, Ethereum and other high-profile cryptocurrencies in the market.

iv. Blockchain technology adoption and integration for businesses. If you are a business owner or individual who wants to create their own cryptocurrency tokens, you need not look any further. Our expert blockchain developers can create custom tokens in the shortest period possible. We can help you from start to finish including preparing and running a successful Initial Coin Offering for your start-up. We can even develop smart contracts that you can integrate into your business to reduce your operating costs.

v. Cryptocurrency research and development. Our expert team of blockchain developers can innovate and introduce new ideas to keep us ahead of our competition. If you need to have an upper edge in a competitive environment, our innovative solutions can help you leverage technology to get on top.

vi. Website designs. In the era of e-commerce, you need to ensure that you have a good website that is both aesthetically appealing and optimized to give visitors the best experience. We will ensure that your website is interactive by combining the best graphic designs with your website's front end.

vii. Bitcoin payment integration. More people around the world are turning to Bitcoin, Ethereum, and other cryptocurrencies to offer an effective solution to the avoid theft from hackers. However, most businesses struggle to integrate these payment solutions to their websites. TechProCoin ensures that your customers can pay with Bitcoin or any altcoin on the market with ease.

viii. Online betting and games. We are planning on launching our own online betting platform where people can bet against others. People will be able to bet on sports and other events with ease. Everything will be blockchain-based to provide transparency to our betting community. There will also be some casino games that people can play online.

ix. Dapps and games. Our blockchain experts can create effective DAPPs for our clients. DAPPs are the future of blockchain technology, they allow firms to use web apps that are linked to blockchains. DAPPs are more secure but they provide the same functionality. We can help businesses scale their sites to DAPPs to improve security while enjoying the benefits of blockchain technology.

## UNIQUE PROPOSITION

We are planning on offering all these services through our blockchain. The blockchain will be run by TechProCoin tokens that will be available on most of the major exchanges around the world. Clients who seek our services will only be able to pay for them using our tokens. This gives our tokens utility. Unlike most cryptocurrencies that are created for pure speculation, our tokens serve a purpose, giving them greater value in the market. As a result, investors who back us during the development stage will be able to make good profits from the listing price once the token is officially launched.

Therefore, our ICO serves to empower the masses financially by offering them a token they can buy at a discounted rate during the ICO and make a good profit once the platform is launched. We are also planning on sharing the proceeds from our cryptocurrency mining and trading with those holding our tokens. Investors will earn a daily percentage each day they are holding the TechProCoin token. Additionally, our services are empowering SMEs by offering them unique services to allow them to take advantage of blockchain technology.

### WHY CHOOSE US?

Backing TechProCoin offers numerous benefits to investor and clients who want our other services. The benefits over our competitors include:

- a.** A competent and professional team. All the members of our development team are experts in their respective fields. We will treat all our clients and investors with the utmost professionalism while offering high-quality services and software products. Our goal is ensuring that we help clients achieve their objectives by leveraging the right technology solutions.
- b.** 24/7 hours customer support. We will ensure that customers are able to reach us 24/7, all year round without an iota of compromise. We understand that business downtime increases the risk of losses and loss of customers. Therefore, our technicians are always on hand to help clients solve any problem.
- c.** Pocket-friendly solutions. We understand the tight budgets that SMEs have to work with. Therefore, we ensure that our class-leading services are affordable without compromising on the quality.
- d.** Investor benefits. Investors who support us will earn a myriad of benefits. They include:
  - Handsome profits from our discounted ICO prices. We offer good early bird bonuses that offer investors between 5-20 percent discounts on the launch prices. This is an opportunity for investors to make a good income by taking part in our ICO.
  - Daily earnings once the platform is launched. Once the platform is launched, we will be rewarding token holders daily with airdrops from the profits made from the mining farm and the cryptocurrency trading pool. This is unique in the industry offering daily benefits.
  - Investors can make money speculating TechProCoin tokens. Investors only need to hold the tokens for a while before they reap from the increase in value.

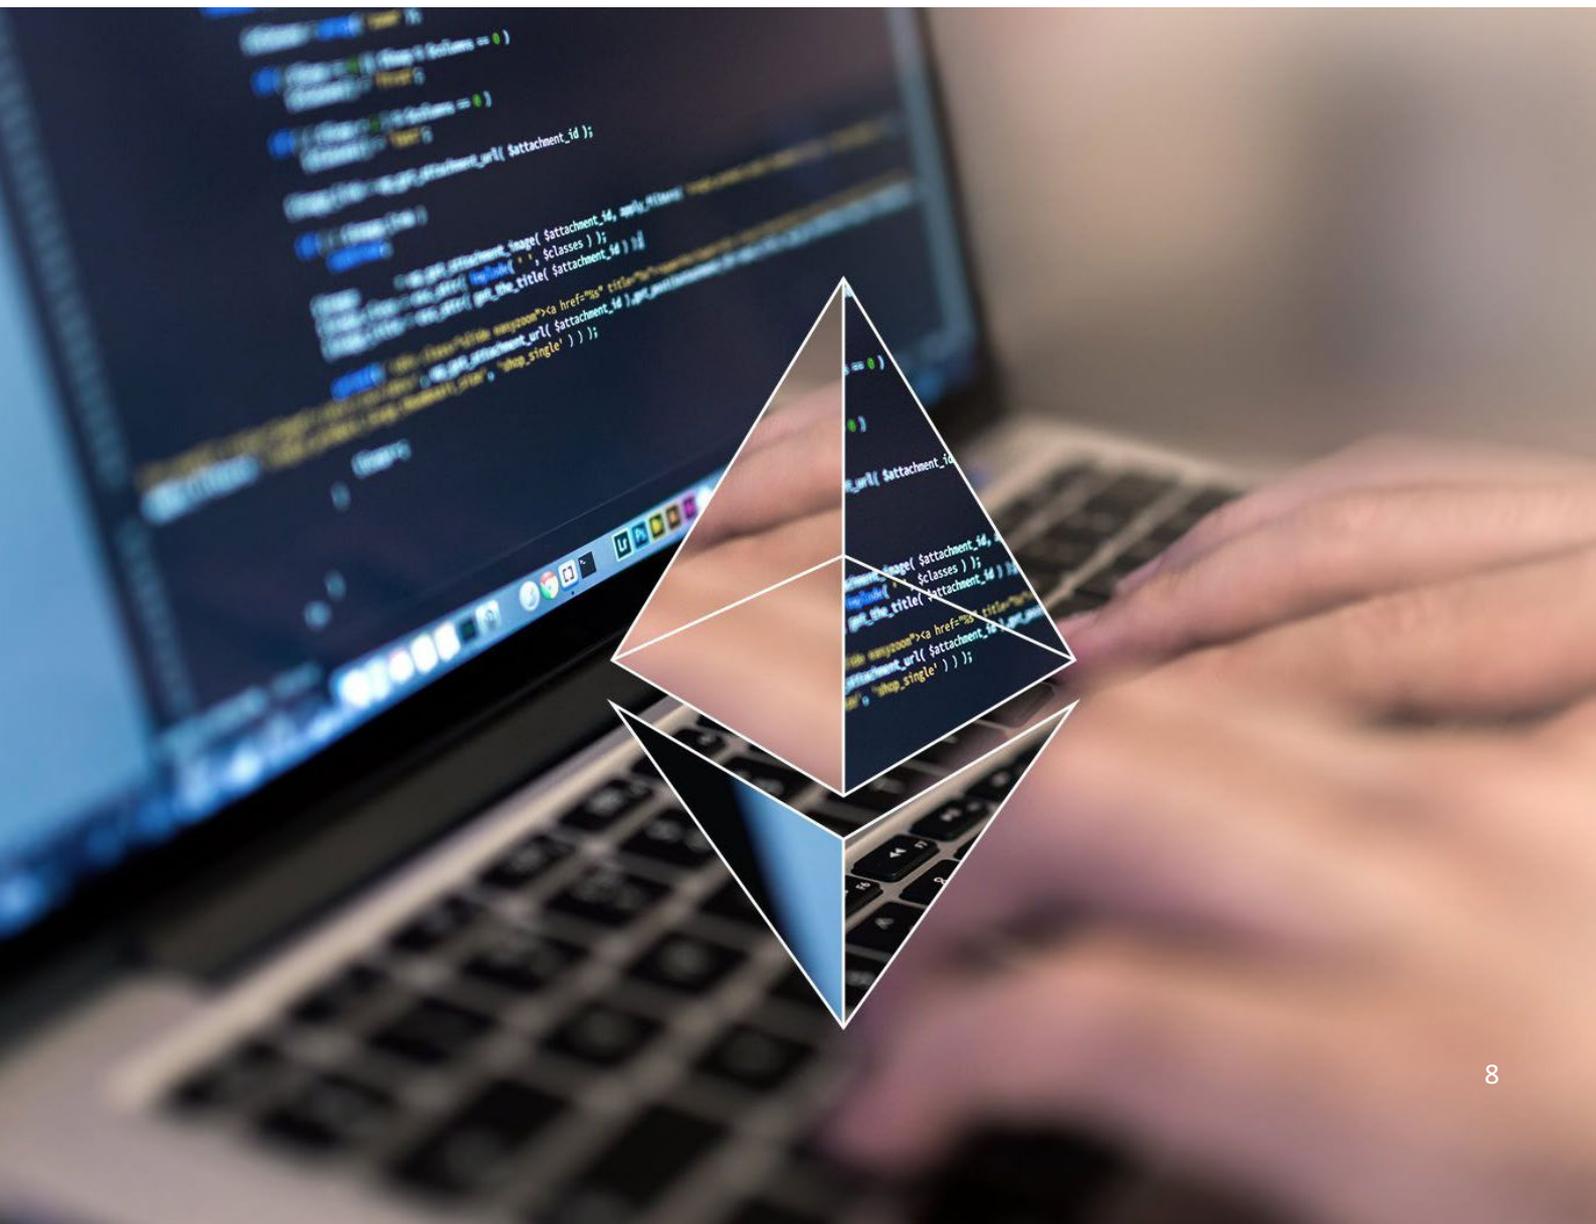

# TECHNICAL SPECIFICATIONS

TechProCoin will rely on the Ethereum parent chain to provide the security features while executing transactions on the platform. The blockchain will rely on KECCAK256 hashing algorithms. This is more advanced than the SHA256 and SHA3 variants used in Bitcoin and other altcoins. The TechProCoin token will be an ERC20 and it will be compatible with most ERC20 wallets like MyEtherWallet, Trezor, MetaMast, Mist, Parity, Trust, and Exodus.

Since it relies on the Ethereum Virtual Machine (EVM), the transactions are completed using smart contracts. These smart contracts are commands written using Solidity to complete transactions that are based on if-this-then-that logic. Solidity as the programming language makes it easy to improve the platform because it is an iteration of JavaScript. Any new features introduced to the Ethereum Virtual Machine (EVM) will be easily added to the blockchain without extensive coding. The API clusters support low latency transactions.

This means that it will be able to handle a high volume of transactions on the blockchain at fast speeds. This gives real-time response regardless of how many users are on the platform. We will also be creating DAPPs and smart contracts for clients that will run on the Ethereum blockchain.

## TEAM

The TechProCoin team is made up of a variety of professionals from all around the world. There are web design experts, blockchain engineers, smart contract developers, digital marketing experts, graphics designers who specialize in web design, expert cryptocurrency miners and traders as well as DAPP developers. The team is brought together with the goal of creating a platform that will empower SMEs to adopt blockchain technology while using our expertise to earn users money using the mining farm and the trading pool.

# TECHPROCOIN ICO

## ICO GOALS

The main goal for conducting the ICO is to raise funds for the development of the blockchain and to raise funds for the capital pool and the mining farm. The total supply of TechProCoins that will be launched in the market is 200,000,000. The Pre-ICO will run from 4th to 25th June 2018 and the main ICO will run from June 25th to July 31st, 2018. An early bird bonus will be offered to investors who wish to support the platform. The Pre-ICO list price will have a 20% discount while the ICO price will have a 10% discount. The listed price will be \$0.10

We will ensure to distribute investor tokens 10 days after the ICO. The TechProCoin tokens will be ERC20 based and investors are asked to use ERC20 compliant wallets when making the purchases. This will protect your investment as the tokens will be distributed to the wallets that make the investment.

## ICO PARTICULARS

Website:	<a href="http://www.techprocoin.com">www.techprocoin.com</a>
Coin name:	TechProCoin
Abbreviation:	TPC
Total Supply:	200,000,000
Decimals:	18
Mining:	No
Pre-ICO dates:	11th-25th June 2018
ICO crowd sale:	25th June- 31st July
Token Distribution:	10th August (10 days after ICO end date)
Mode of payment:	BTC

## ROADMAP

TechProCoin was conceptualized in the 4th Quarter of 2017 and the development team was formed around the same period. In the 1st quarter of 2018, the ERC20 token was registered and the whitepaper was created. The website was also created at this point. The Pre-ICO and the ICO will be held in the 2nd and 3rd quarter of 2018. The Pre-ICO will run from 11th to 25th June 2018 and the main ICO will run from June 25th to July 31st, 2018. The tokens will be distributed in the 3rd Quarter around 10th August. TechProCoin will be listed in the coin market exchange in the 4th Quarter. The Apps, games and decentralized betting will be launched in the 4th quarter of 2018 while the blockchain will be officially launched in the 2nd Quarter of 2019.
